

JORNADAS GEOPHYSICS 100 YEARS

Coordina
JAIME URRUTIA FUCUGAUCHI
Miembro de El Colegio Nacional

Presentación
JAIME URRUTIA FUCUGAUCHI

Conferencia
SATELLITE EARTH OBSERVATION APPLICATIONS AND CHALLENGES
Imparte
MICHAEL SIDERIS
International Union of Geodesy and Geophysics

Conferencia
CENTENNIAL ANNIVERSARY OF INTERNATIONAL COOPERATION IN EARTH AND SPACE SCIENCES
Imparte
ALIK ISMAIL-ZADEH
International Union of Geodesy and Geophysics
International Science Council

Jueves 25 de octubre de 2018, 14 h
ENTRADA LIBRE
Donceles 106, Centro Histórico, CDMX

FORO GEOFÍSICA 100 AÑOS

En 2019 se celebra el centenario de la creación de la Unión Internacional de Geodesia y Geofísica (IUGG) y de la Unión Geofísica Americana (AGU). En el Foro se discutirán programas, proyectos y oportunidades sobre colaboración internacional en Ciencias de la Tierra

28 octubre – 2 noviembre, 2018

Foro Geofísica 100 Años
Panelistas
Lucía Capra
Hugo Delgado Granados
Alik Ismail-Zadeh
William Lee Alardín
Christine McEntee
Joaquín Ruiz
Efraín Villanueva Arcos
Kathryn Whaler

Coordinadores
Alik Ismail-Zadeh
Ligia Pérez Cruz
Jaime Urrutia Fucugauchi

Hotel Sheraton Buganvilias, Puerto Vallarta, Jalisco, México

The celebration of the IUGG Centennial in Mexico started in Mexico City. A symposium dedicated to the 100th anniversary of international geoscience cooperation was held at El Colegio Nacional on 25 October 2018. Jaime Urrutia-Fucugauchi, a Fellow of the Colegio Nacional, welcomed the participants of the symposium and introduced two public lectures given by Michael Sideris, IUGG President, and Alik Ismail-Zadeh, IUGG Secretary General and Inaugural Secretary of the International Science Council (ISC). The lectures were delivered in English and simultaneously translated into Spanish. The IUGG President delivered a lecture entitled “Satellite Earth Observation and Geosciences” and the IUGG Secretary General lectured on “Centennial Anniversary of International Cooperation in Earth and Space Sciences”, which were followed by questions. The lectures were [videotaped](#).

The celebration was continued during the Annual Meeting of the Mexican Geophysical Union on 29 October 2018 in Puerto Vallarta, Mexico. The Plenary Session discussed past development of international geoscience cooperation and future perspectives of the cooperation related to challenging problems of society, involving early career scientists and cooperation between North-South and South-South. Representatives of IUGG (Vice President Kathy Whaler and Secretary General Alik Ismail-Zadeh), the American Geophysical Union (Executive Director Christine McEntee), the Mexican Geophysical Union (President Ligia Pérez Cruz), the Mexican National Committee for IUGG (President Hugo Delgado Granados) and others were among the panellists of the Plenary Session chaired by Jaime Urrutia Fucugauchi.
